

## Zetechtics Ltd

www.zetechtics.com

Manufacturers of Subsea Control Systems & Associated Instrumentation for the Global Offshore Oil Industry

## **ENVIRONMENTAL POLICY**

Zetechtics are market leaders in Subsea Control Systems for Remote Operated Vehicle Tooling Intervention. Our environmental policy is central to our design, production, support and training processes. As a responsible organisation, we aim to protect the environment and prevent pollution through the following commitments:

- Comply with all applicable environmental legislation and other requirements
- Consider environmental issues when developing new products, initiatives and improvements to our operations.
- Use energy and resources efficiently and reduce consumption where possible
- Minimise pollution and the generation of emissions and waste
- Avoid the generation of waste and where possible, re-use and recycle all waste streams
- Avoid unnecessary use of hazardous materials and products, seeking alternatives where possible
- Design products taking into account our significant environmental aspects and sustainability principles
- Continually improve our environmental management system in order to improve our environmental performance
- Set and review realistic and achievable environmental objectives
- Provide appropriate resources for the implementation of this policy
- Communicate the policy to all interested parties
- Provide staff training so employees are aware of the environmental policy
- Maintain certification to ISO 14001:2015.

The operation of this policy, associated procedures and objectives will be monitored and reviewed on a regular basis to ensure that they remain current and applicable to all our activities. This policy has been endorsed by the directors who give their full support to the implementation of the policy.

Taking care of the environment and our future

Our Environmental Management System sets out our objectives, responsibilities and plans to maintain standards to protect the environment.

We are committed to continually improving our systems of working in order to use resources in a sustainable manner, protect the environment, prevent pollution and comply with relevant environmental legislation.

## Scope of approval:

Design, development, manufacture, training and through-life product support services for:

- Surface and sub-sea monitoring and control systems
- Remote intervention tooling (RIT).
